

## Entopop Black Soldier Fly Puffed Larvae

100% *Hermetia illucens*

### Application:

Suitable for a broad range of applications in Petfood, Animal Feed, Poultry Feed and Aquaculture.

### Description:

Entopop puffed black soldier fly larvae contain up to 50% of high-quality protein, as well as necessary vitamins, fats, and amino acids. They are rich in antimicrobial, medium-chain fatty acids which have proven gut health benefits. Their shell is made of chitin, which is a great source of fibre that further boosts gut health.

### Statements:

Entopop offers a sustainable solution to feed industry.

INSPRO Malaysia does not add any pesticides, antibiotics, growth hormones, microplastics or chemical additives in the production of Entopop.

### Composition:

Entopop is an excellent source of proteins rich in essential amino acids, vitamins, minerals, medium chain fatty acids & source of antimicrobial peptides (AMPs).
